

Exceptional websites for
School Districts & Local Governments
that are affordable and easy to update...

by **EZTASK**

ezBlogssm *collaboration the ezTask way!*

ezTask's ezBlogs module combines the easy-to-use functionality you have come to enjoy with all of the netStartEnterprise CMS functionality designed for your organization. Your ezBlog can be configured for private use which requires your users to login to access your blog. Your visitors' comments can be submitted to you via an email that includes all of the approval options needed to manage your posts!

Go Public or Private

ezBlog can be configured as a private blog that requires user authentication to access your posts or you can allow any visitor on the web to see your blog.

RSS Feed Subscriptions

Integrated RSS Feeds make it easy for your visitors to subscribe to your blog and stay up to date with your content.

Moderated Commenting... *Just to be Safe!*

With the moderated comments function selected your visitors can comment on your post without going "Live" until you have approved the comments.

WYSIWYG ezEditor4.0

Our ezEditor is designed to make editing web pages a snap from any computer. If you know how to use a word processor you will be right at home.

Manage Your Comments via Email

Comments made on your ezBlog will be submitted to any email account(s) that you configure. The email contains links to: Approve, mark as SPAM or Delete the incoming comments right from your email.

Controlling Access to Your ezBlogs....

Managing users access to your blog or commenting is a snap with the ezBlog "Security Settings". Input users manually or import a list of users from Excel or any Text Editor.

SPAM Protection

You can configure your ezBlog to include a dynamic captcha bot that ensures that a human is inputting the comments and not a SPAM robot.

ezBlog is a netStartEnterprise add-on module...

Like other netStartEnterprise modules the ezBlog module can be added to your netStartEnterprise project in a flash!

The netStart "Look and feel"

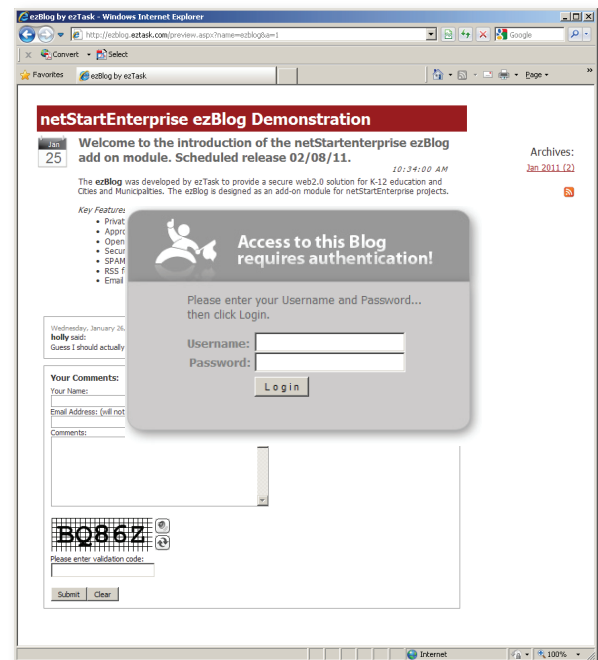

Your ezBlogs can be integrated into the look and feel of your existing netStart web site or you can create a whole new look for your bloggers.

Search Engine Friendly

Add unlimited keywords and descriptions to make your blog search engine friendly and make it easy for your visitors to find you.
