

**PILLAR 5: DATA DRIVEN INSTRUCTION**

**DDI** is a precise and systematic approach to improving student learning throughout the year. The cycle of DDI includes assessment, analysis, and action for the success of each student. By Data Driven we also reference the shift to a data culture vs. an accountability culture.

- Data driven PLCs
- EAA Data Analysis Protocol

- Teachers Will:**
- Engage in the EAA Data Analysis Protocol
  - Utilize multiple measures of data during Partnership Team meetings with students and teachers
  - Develop a schedule and timeline for data gathering and conferencing
  - Participate in and lead PLCs to dig into/analyze data, discuss instructional practice, and determine needed interventions or extensions
- Students Will:**
- Use data to set and monitor goals for learning and mastery
  - Reflect on learning experience and determine which strategies are working
